## SUMMARY

Someone who has an interest in system automation. Have worked on web-based projects such as correspondence system, leave application system, room rental system. Have attended courses related to data, Using python to analyse data and several machine learning libraries such as scikit-learn and tensorflow.

## WORK EXPERIENCE

### Queen Rebecca Indonesia - Queeri

Yogyakarta, ID

IT Staff - Internship

Aug 2024 – Feb 2025

- Created new features and fixed existing bugs in the web admin using NuxtJS and NestJS, for 3 months.
- Create a search feature that can make it easier for users to manage their database, for 1 week using NuxtJS
- Create a post scheduling feature so that it can make it easier for users to post content which can make it easier when the server is slow, for 2 weeks using NuxtJs as a front-end and NestJS as a backend.
- Create a content change feature with checkboxes so that it is easier for users to handle content changes, especially in urgent situations, using the Vue and NuxtJS libraries..
- Fixed frequent bugs such as the ui suddenly changing and as well as fixing a bug on the backend side that often returned a null value that hindered client rendering.
- Tidy up the source code structure so that it is easy to collaborate and deployed the application so that it can be accessed generally using GitHub.
- Handle the database if there is a delay that occurs so that data changes are not recorded in the database, using Dbeaver as a database connection.

### Peluang.co

Online, ID

Web Developer - Internship

Mar 2024 – May 2024

- Created an e-commerce website whose products are franchises, for 3 months. responsible for creating APIs on the server side using Laravel.
- Created an API as an intermediary for user and service provider communication in 1 week using PHP Laravel.
- Created a database without relations to store all product and user data in 1 week using MongoDB.
- Deployed the application so that it can be accessed generally using GitHub.

### Freelance Project

Online, ID

Web Developer - Freelancing

Mar 2023 – Aug 2023

- Created of a company website to facilitate the leave permit system so that it can be submitted and approved more efficiently, for 6 months using the Laravel framework.
- Designed the flow of business processes as an overview of the application system using flowchart diagrams.
- Designed a database based on the flowchart that has been made to store system data using MySQL.

- Customized the user interface to match the system flowchart that has been created using the Bootstrap library.
- Built a system using the MVC concept so that the appearance is neat and can be easier to maintain if there are problems.
- Documented changes to the code so that developers can record any changes that have been made using github version control.

## **CERTIFICATION & BOOTCAMP**

### **Eduwork**

### **Online, ID**

*Bootcamp Fullstack MERN (MongoDB, ExpressJS, ReactJS, NodeJS)*

*Sep, 2023 – Jan, 2024*

- Learned the fundamental of website Introductions, HTML introductions, and various tags of CSS and practice using it for 1 weeks using Notepad++
- Learned to style the website using the library so that it will save more time and do the training task for 1 week by using bootstrap.
- Learned the importance of version control which can be useful for documenting any changes to the code made over 2 days using git and github.
- Learned basic javascript fundamentals such as data structures, control flow, functions, destructuring, and conditonal variables for 1 week and learn to implement it using vs code and browser.
- Learned the concept of oop in javascript for 1 week and learned to implement it using vs code.
- Learned the concept of promised, asynchronus, callback, rest parameter in javascript for 1 week and learn to implement it using vs code.
- Learned basic fundamentals ReactJS such as data basic component, styling component, and reusable component for 1 week and learn to implement it using vs code and browse.
- Learned more knowledges of ReactJS such as form validation and lifecycle component for 4 days and learn to implement it using vs code and browser.
- Learned advanced knowledges of ReactJS such as hook, routing, redux for 2 weeks and learn to implement it using vs code and browser.
- Learned about NodeJS and ExpressJS for 1 weeks and learn to implement it using vs code and browser.
- Learned about database and it's relative such as CRUD, API, and relational for 1 week using MySQL.
- Learned about MongoDB, a database that is more flexible for mern projects for 1 week.
- Worked on the back end final project as a requirement for completing 1 week of learning using NodeJS and ExpressJS.
- Worked on the front end final project as a requirement for completing 2 weeks of learning using ReactJS and bootstrap.

## **EDUCATION**

### **Universitas Kristen Duta Wacana**

### **Yogyakarta, ID**

*Bachelor Degree (S-1) - Information System*

*Aug 2019 – now*

- In the Software Engineering course and other programming courses such as RESTful API Design, Front-end Programming, Web Programming, and Automated Testing, learned to build applications as a whole from system design, database design, to application development both front-end and back-end.

- Built a web-based campus room lending system that aims to make it easier for campus residents to see room usage schedules and book rooms for meetings if there are vacancies, using **Laravel** as a system framework.

## SKILLS, INTERESTS, & LANGUAGES

---

**Technical Skills :** NodeJS | ReactJS | React Redux | Bootstrap | ExpressJS | Javascript | MongoDB | RESTful API | OOP | Laravel | MySQL | PHP | HTML | CSS | Python

**Soft Skills :** Adaptative | Teamwork | Time Management | Critical Thingking | Inovative

**Interests:** Web Developer | Front-end Developer | Back-end Developer | Full-stack Developer

**Language :** Indonesia (Native), English (Intermediate)

## PROJECTS

---

**UI Slicing** *Des, 2023 – Des, 2023*

Details : create a company news web for events and write articles

Tools : ReactJS, HTML, CSS, Bootstrap

Link : <https://github.com/alno09/sistemPermohonanCuti.git>

**CutaCuti** *Mar, 2023 – Aug, 2023*

Details : Creation of a company website to facilitate the leave permit system so that it can be submitted and approved more efficiently.

Tools : Laravel, PHP, Bootstrap

Link : <https://github.com/alno09/sistemPermohonanCuti.git>

**Room Rental SIKOSAN** *Sep, 2023 - Dec, 2023*

Details : Website that aims to facilitate room borrowing, so that customers can find out at what time the room is empty and can be booked.

Tools : Laravel, PHP, Bootstrap

Link : <https://github.com/alno09/peterpan.git>

**Mailing System** *Aug, 2021 – Des, 2021*

Details : System that used to make it easier for campus residents to apply for and grant campus event permits.

Tools : Laravel, PHP, Bootstrap

Link : <https://github.com/alno09/sistemPermohonanCuti.git>
